

## **REMARKS**

Claims 1-25 are pending in the application. The Examiner rejected Claims 1-25 under 35 U.S.C. §103(a) as being unpatentable over Kirby et al. (U.S. Patent 6,549,229) in view of Cline (U.S. Patent 4,903,298).

Please amend Claims 1, 19 and 25 as set forth herein. No new matter has been added.

Regarding the rejection of independent Claims 1, 19 and 25 under §103(a), the Examiner states that Kirby et al. in view of Cline renders the claims unpatentable. Kirby et al. discloses a small, portable, self-contained, video teleconferencing system; and, Cline discloses a system for providing encryption and decryption of voice and data transmissions to and from an aircraft.

Amended Claim 1 recites a controller coupled to the black side and the red side switches for powering down the switches in a secure mode and powering up the switches in a non-secure mode, wherein in the secure mode the relays default to connect the encryption device into a communication path.

Amended Claim 19 recites if the operating mode is secure mode, powering down and defaulting to second contacts of two switches and communicating data between the two switches via a secure module; and if the operating mode is non-secure mode, powering up and enabling first contacts of the two switches and communicating data between the two switches directly.

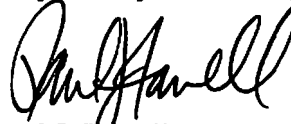

Amended Claim 25 recites a controller for controlling the black side and the red side switches to power down and default to a secure path connection between the black side and the red side switches via the encryption device or to power up and enable a non secure path connection directly between the black side and the red side switches.

It is respectfully submitted that neither Kirby et al. nor Cline, either alone or in combination, teach or disclose at least the feature of powering down switches to default to a secure mode operation, as recited in Claims 1, 19 and 25.

Independent Claims 1, 19 and 25 are believed to be in condition for allowance. Without conceding the patentability per se of dependent Claims 2-18 and 20-24, these are likewise believed to be allowable by virtue of their dependence on their respective amended independent claims. Accordingly, reconsideration and withdrawal of the rejections of dependent Claims 2-18 and 20-24 is respectfully requested.

Accordingly, all of the claims pending in the Application, namely, Claims 1-25, are believed to be in condition for allowance. Should the Examiner believe that a telephone conference or personal interview would facilitate resolution of any remaining matters, the Examiner may contact Applicant's attorney at the number given below.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Paul J. Farrell", written in a cursive style.
